Made in Korea: the evidence

- **Printed on the product.** "Water Healer / Made in Korea" is printed on the face of the head-type shower head.
- **Listed on our official Korean store.** The product information table lists the manufacturer FLORENCE Co., Ltd. and the country of manufacture: Republic of Korea.
- **Made with partner factories in Korea.** Filters are made with partner factories in Gyeonggi-do, Korea, and supplied by FLORENCE Co., Ltd. from Paju.

Proven with Korean customers (Naver Smart Store, as of 2026-10-05)

Product	Reviews	Average rating
Travel shower filter	1,824	4.87 / 5
Large-capacity home filter	110	4.92 / 5
Head-type filter shower	43	5.0 / 5

What Korean customers say

"Most filters like this have only one filter, but this one filters in both the head and the body. Installation is just twist-on, so it's really easy. The design is simple and clean, too."

Head-type filter shower · Naver Smart Store · 2026-09-15

"10 days in Spain and Portugal, a different place every night, and it fitted every shower. From day 6 I could see the filter changing colour as it worked. ... Wishing this Korean company every success."

Travel shower filter · Naver Smart Store · 2026-06-09

"It looks clean and the water flows well. ... Assembly was very easy and it fitted our faucet."

Large-capacity home filter · Naver Smart Store · 2026-09-07

Four lines, one thread standard

Water Healer supplies four lines made in Korea: a large-capacity home filter (Gen 3), an 8-stage dual-filter shower head, a compact travel shower filter, and matched refill cartridges. All finished sets connect with a standard G1/2 (15A) thread. MOQ, price and lead time are provided with a quotation.

Line	Use	Versions	Replacement	Thread
Large-capacity home filter	Daily home showers	Total Care / Limescale Care	About 6 months	G1/2 (15A)
Head-type filter shower	All-in-one home shower head	Dual filter: one in the head, one in the body	About 4 months	G1/2 (15A)
Travel shower filter	Hotel and travel showers	Basic / Limescale	About 3 months	G1/2 (15A)
Refill cartridges	Installed sets	Travel / Gen 3 / head and body	About 3 / 6 / 4 months, by set	G1/2 (15A)

Replacement periods are guidelines. A cartridge may need replacing two to three times sooner depending on water quality and usage.

Why partners choose Water Healer

- **Two cartridge systems.** Travel cartridges for travel sets and Gen 3 cartridges for Gen 3 housings. Each cartridge matches its own housing.
- **Simple to install.** Standard G1/2 (15A) thread. Hand-tighten between head and hose, on the faucet outlet or on a rain-shower arm.
- **Visible replacement cue.** In clear housings the media changes color (white, yellow, brown). Deep brown means it is time to change.
- **Refills for every installed set.** The housing is bought once. Cartridges are replaced on a cycle, so every installed set supports repeat refill orders.
- **Limescale versions.** Limescale versions add an ion-exchange stage designed to help manage scale-forming minerals in harder water.

Large-Capacity Home Shower Filter (Gen 3)

A clear-housing filter for daily household showers, with a thick 5-layer core and an 8-stage structure. Made in Korea.

Features

- **Clear housing.** The housing is transparent, so the color change of the media is visible: white, then yellow, then brown. Deep brown means it is time to change.
- **Designed around the shower.** Sediment and rust particles are captured mechanically. Dedicated media are designed to help reduce residual chlorine.
- **Two versions.** Total Care is for everyday use. Limescale Care adds an ion-exchange stage designed to help manage scale-forming minerals in harder water.
- **Three install positions.** Between head and hose, on the faucet outlet, or on a rain-shower arm. Hand-tighten, no tools.

How to install the large-capacity filter

1. Choose the position: Between the shower head and hose, on the faucet outlet, or on a rain-shower arm.
2. Hand-tighten: Screw the filter onto the G1/2 (15A) thread by hand. No tools are needed.
3. Connect: Attach the hose or shower head to the other end.
4. Run the water: Run the shower for about 5 minutes before first use.

Specifications

Use	Daily home showers
Versions	Total Care / Limescale Care
Filtration structure	5-layer core, 8-stage structure
Connection thread	G1/2 (15A)

8-Stage Filter Shower Head (Dual Filter)

A dual-filter shower head with one filter in the head and one in the body, and a 350-hole spray plate. “Made in Korea” is printed on the head.

Features

- **Two filters, one shower head.** One filter sits in the head and one in the body. Head and body are replaced separately.
- **Eight-stage structure.** Eight filtration stages across the dual filter, listed below.
- **350-hole spray plate.** Designed for a fuller spray.
- **Standard connection.** G1/2 (15A) hose connector. Twist on by hand.

How to install the head-type filter shower

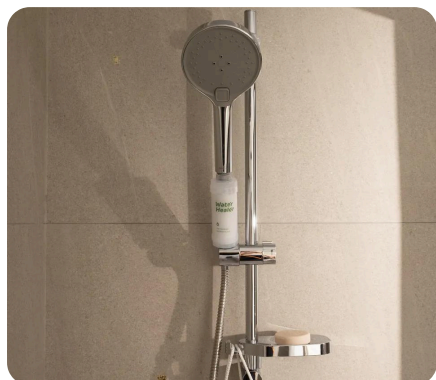

1. Remove the old head: Unscrew the existing shower head from the hose.
2. Assemble: Join the head and the body; they are packed separately.
3. Twist on: Screw the body onto the hose with the G1/2 (15A) connector, by hand.
4. Run the water: Run the shower briefly before first use.

Specifications

Use	All-in-one home shower head

Travel Shower Filter

A compact inline filter that installs between a shower head and hose, on the faucet, or on a rain-shower arm, and packs into carry-on luggage.

Features

- **Basic version.** Designed to help reduce residual chlorine and sediment in shower water.
- **Limescale version.** Adds an ion-exchange layer designed to help manage scale-forming minerals.
- **Standard thread.** G1/2 (15A) thread. Hand-tighten in place.
- **Light to pack.** Small enough for carry-on luggage. The cartridge is replaced by hand.

How to install the travel shower filter

1. Remove the shower head: Unscrew the shower head from the hose.
2. Fit the filter: Screw the filter onto the hose by hand (G1/2, 15A thread).
3. Refit the head: Screw the shower head onto the filter.
4. Run the water: Run the shower for about 5 minutes before first use.

REFILLS

Refill Cartridges

Each refill is made for its own housing. Travel refills fit travel filters (about 3 months), Gen 3 refills fit Gen 3 large-capacity housings only (about 6 months), and the head-type filter shower uses separate head and body refills (about 4 months). Cartridges are swapped by hand.

Planning refills

- One installed travel set needs about 4 refills a year at the guideline interval.
- One large-capacity set needs about 2 Gen 3 refills a year.
- Gen 3 Total Care refill barcode: 8800364840166.
- Multi-pack configurations are discussed with the quotation.

The eight stages (head-type)

- | | |
|--|---|
| 1. Pad filter | 5. Water Healer filter |
| 2. Water Healer filter | 6. White ball |
| 3. Activated carbon fiber (ACF) filter | 7. Loess ball |
| 4. Non-woven filter | 8. Filter ball (material to be confirmed) |

Working with us

There are four ways: distribution of Water Healer sets and refills in your territory, retail and e-commerce supply, private label (OEM/ODM) under your brand, and supply for hotels and residences. MOQ, price, lead time and payment terms are provided with a quotation after we understand your market and volume.

Private label scope

Brand and packaging	Logo, box and instructions.
Filter version	Basic, Total Care or Limescale builds.
Housing appearance	Color and print, agreed per project.
Language and labels	Translation and review for your target language.
Documents	Specification sheet and barcode.

Commercial terms

Price (FOB / EXW)	Contact us for quotation
MOQ	Contact us for quotation
Lead time	Contact us for quotation
Payment terms	Contact us for quotation
Samples	Terms agreed with the quotation
Loading port	FOB Korea. Port confirmed for each order
HS code	Provided with the quotation
Packing and carton	On request

How an order works

- 1. Inquiry** Send the quote form with your country, products and expected quantity.
- 2. Review** We may ask about your sales channel and market.
- 3. Quotation** Price, MOQ and lead time come with the quotation.
- 4. Samples** Sample terms are agreed with the quotation.
- 5. Order and production** Order confirmed, production and final inspection.
- 6. Shipment** FOB Korea. The loading port is confirmed for each order.

Independent test reports

Tests were run by KTR (Korea Testing & Research Institute) on Water Healer filter samples. We share the reports with qualified buyers on request instead of publishing figures here.

- Residual chlorine
- Suspended solids
- Heavy metals (Pb, Cd, Hg, As, Cr6+)
- Calcium, magnesium and total hardness
